

# We Must STAY Strong!

THE MORE SCIENCE LEARNS ABOUT LIFE BEFORE BIRTH,  
THE HARDER PRO-ABORTION FORCES FIGHT TO KEEP IT LEGAL.

Studies show that gestational development of the unborn is simply amazing!

The heartbeat can be heard 6 weeks after conception

By 17 weeks, the heart pumps 6 gallons of blood a day

The fetus is surprisingly active in the womb. The unborn can:

- Hiccup early in the first trimester
- Hear at 18 weeks
- Feel pain at 20 weeks
- Suck their thumb at 20 weeks
- Dream at 25 weeks
- Cry (although not audibly) by 28 weeks
- Learn and individuate noises and language patterns early on

Partner with Wisconsin Right to Life and help continue our lifesaving work!

Mail donations to: P.O. Box 58, Wausau, WI 54402
